

IXTREMA QUIET FANS

With the best noise-to-airflow ratio of any PC case fan in the world and available in a variety of sizes, SilenX **iXtrema Quiet Fans** are an ideal way to begin your silent computing experience today.

Hybrid bearings
reduce weight and noise

Forward-swept blade design
maximizes airflow

Silicone composite mounts
put an end to vibration noise

3 → 4 pin converter
to power your fan from
your PC's power supply or
motherboard

* iXtrema 92mm fan shown. Fan and accessories not shown to scale. Package includes weighted screws for cases that do not support silicone composite mounts. Appearance of actual product may differ slightly from images.

IXTREMA QUIET LED FANS

We took our award-winning iXtrema Quiet Fans and souped them up for case modders.

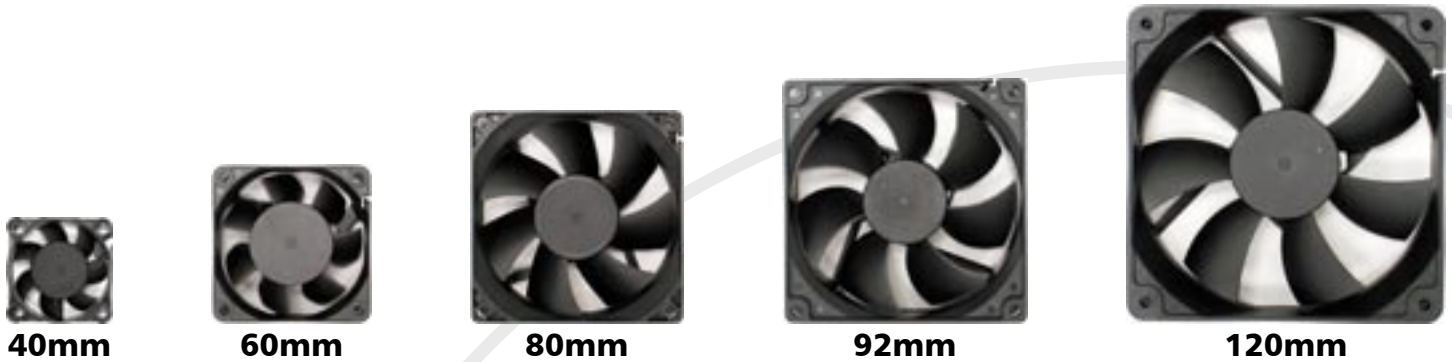

iXtrema Quiet LED Fans come in iridescent blue, green, and red—mix or match to fit your style.

Available in 80mm (shown) and 120mm sizes.

IXTREMA QUIET FANS

Notes

All measurements are taken in an anechoic chamber from a distance of 1m along each of the 3 axes. Actual noise output may vary depending on the ambient temperature and amount of obstructions in the airflow path.

The silicon composite fan mounts and weighted mounting screws are not designed to be used together. Weighted mounting screws are provided for installation in cases that do not support the silicon composite fan mounts.

System requirements

Please check your case specifications to determine what fan size(s) it accepts. SilenX iXtreme Quiet Fans and iXtreme Quiet LED Fans can be powered by a PC's power supply or motherboard.

Package contents

One (1) fan. Four (4) silicone composite fan mounts. Four (4) weighted mounting screws. One (1) 3- to 4-pin converter. All SilenX iXtreme Quiet Fans and iXtreme Quiet LED Fans are backed by a one-year manufacturer's warranty.

Some models come with a small extender at the end of the 3-pin plug. If your fan includes such an extender, be sure to use it. Operating the fan without this extender will cause the fan to run louder than specified.
